

Day26:

Program 1: Write a Program to check whether the entered number is Abundant number or not.

{Note: a number can be termed as abundant if the sum of all of its perfect divisors is greater than that number itself, e.g. 12:  $1+2+3+4+6 = 16 > 12$  so 12 is an abundant number.}

Input: 18

Output: 18 is abundant number since  $1 + 2 + 3 + 6 + 9 = 21$ , which is greater than 18.

Program 2: Write a Program to Convert entered Decimal Number to Octal Number

Input: Decimal Number: 15

Output: Octal Number: 17

Program 3: Write a Program to that skips the occurrence of perfect numbers using continue statement. Print this sequence up to 100.

Output: 1 2 3 4 5 7 8 9. . . .

Program 4: Write a Program to Print following Pattern.

```

      =
    =   1
  =   1   2
=   1   2   3
```

Program 5: Write a Program that takes an array as input from user and prints the array in reverse order.

Input: 1 2 3 4 5 6 7 8

Output: 8 7 6 5 4 3 2 1
